Mechanisms of Ageing and Development
92 (1996) 249–252

mechanisms of ageing and development

Subject index

Volume 92 (1996)

Acyl-CoA oxidase; Microperoxisomal enzymes; Catalase; Senescence-accelerated mouse (SAM); SAMP8; SAMR1 **92**, 175

Age; Extensor digitorum longus muscle; Rat; Motor neurons; Motor units **92**, 211

Ageing; Cytoplasm perforin; Flow cytometry; Cytolytic cells; Lytic activity **92**, 195

Ageing; Gingiva; Fibroblasts; Periodontitis **92**, 31

Age pigment; Aging; Retina; Vitamin A; Retinal pigment epithelium; Lipofuscin; Phospholipids **92**, 159

Age-related; rRNA genes; Longitudinal study **92**, 101

Aging; Brain; *Ceratitis capitata*; Fruit-fly; PKC; PKCζ **92**, 21

Aging; Brain; Development; Cerebral cortex; Interleukin-6 **92**, 185

Aging; Caloric restriction; DNA polymerases; Brain **92**, 133

Aging; Cancer; Differential survival; Mortality; Natural selection **92**, 111

Aging; Dietary antioxidants; Survival of mice **92**, 227

Aging; DNA synthesis; Gene expression; IGF-I; IGF-I receptor; Osteoprogenitor cells **92**, 1

Aging; Energy restriction; hypothermia; Torpor prevention; C57BL/6; MRL/lrp mice; Lymphoma; Fas antigen **92**, 67

Aging; Rat; Cellular proliferation; Regenerating liver; PCNA; Cellular distribution of PCNA **92**, 53

Aging; Rat; Regenerating liver; DNA polymerases; Synthetic template-primer; Fidelity **92**, 143

Aging; Retina; Vitamin A; Age pigment; Retinal pigment epithelium; Lipofuscin; Phospholipids **92**, 159

Brain; Aging; *Ceratitis capitata*; Fruit-fly; PKC; PKCζ **92**, 21

Brain; Aging; Development; Cerebral cortex; Interleukin-6 **92**, 185

Brain; Caloric restriction; DNA polymerases; Aging **92**, 133

Caloric restriction; DNA polymerases; Aging; Brain **92**, 133

Cancer; Aging; Differential survival; Mortality; Natural selection **92**, 111

Catalase; Microperoxisomal enzymes; Acyl-CoA oxidase; Senescence-accelerated mouse (SAM); SAMP8; SAMR1 **92**, 175

C57BL/6; Energy restriction; hypothermia; Torpor prevention; MRL/lrp mice; Lymphoma; Fas antigen; Aging **92**, 67

Cellular distribution of PCNA; Rat; Aging; Cellular proliferation; Regenerating liver; PCNA **92**, 53

Cellular proliferation; Rat; Aging; Regenerating liver; PCNA; Cellular distribution of PCNA **92**, 53

Cellular senescence; Gene expression; IGFBP-3; PAI-1; SPARC **92**, 121

Cellular senescence; May Apple; Point-of-no-return; Nuclear macromolecules; Nucleolar degeneration; Nuclear matrix; Karyoskeleton; Cytofluorometry; Interferometry **92**, 83

Ceratitis capitata; Aging; Brain; Fruit-fly; PKC; PKCζ **92**, 21

Cerebral cortex; Aging; Brain; Development; Interleukin-6 **92**, 185

Chicken; Hexose transport; α-methyl-D-glucoside; Development **92**, 11

Cytofluorometry; May Apple; Cellular senescence; Point-of-no-return; Nuclear macromolecules; Nucleolar degeneration; Nuclear matrix; Karyoskeleton; Interferometry **92**, 83

Cytolytic cells; Ageing; Cytoplasm perforin; Flow cytometry; Lytic activity **92**, 195

Cytoplasm perforin; Ageing; Flow cytometry; Cytolytic cells; Lytic activity **92**, 195

Development; Aging; Brain; Cerebral cortex; Interleukin-6 **92**, 185

Development; Hexose transport; α-methyl-D-glucoside; Chicken **92**, 11

Development; Maturation; Mesenteric artery; Messenger RNA; Neurotransmitter receptor; Reverse transcription-polymerase chain reaction **92**, 235

Dietary antioxidants; Aging; Survival of mice **92**, 227

Differential survival; Aging; Cancer; Mortality; Natural selection **92**, 111

DNA polymerases; Caloric restriction; Aging; Brain **92**, 133

DNA polymerases; Rat; Regenerating liver; Synthetic template-primer; Fidelity; Aging **92**, 143

DNA synthesis; Aging; Gene expression; IGF-I; IGF-I receptor; Osteoprogenitor cells **92**, 1

Energy restriction; hypothermia; Torpor prevention; C57BL/6; MRL/lrp mice; Lymphoma; Fas antigen; Aging **92**, 67

Extensor digitorum longus muscle; Rat; Motor neurons; Motor units; Age **92**, 211

Fas antigen; Energy restriction; hypothermia; Torpor prevention; C57BL/6; MRL/lrp mice; Lymphoma; Aging **92**, 67

Female mice; Glucose feeding; Longevity **92**, 43

Fibroblasts; Gingiva; Periodontitis; Ageing **92**, 31

Fidelity; Rat; Regenerating liver; DNA polymerases; Synthetic template-primer; Aging **92**, 143

Flow cytometry; Ageing; Cytoplasm perforin; Cytolytic cells; Lytic activity **92**, 195

Fruit-fly; Aging; Brain; *Ceratitis capitata*; PKC; PKCζ **92**, 21

Gene expression; Aging; DNA synthesis; IGF-I; IGF-I receptor; Osteoprogenitor cells **92**, 1

Gene expression; Cellular senescence; IGFBP-3; PAI-1; SPARC **92**, 121

Gingiva; Fibroblasts; Periodontitis; Ageing **92**, 31

Glucose feeding; Female mice; Longevity **92**, 43

Hexose transport; α-methyl-D-glucoside; Development; Chicken **92**, 11

hypothermia; Energy restriction; Torpor prevention; C57BL/6; MRL/lrp mice; Lymphoma; Fas antigen; Aging **92**, 67

IGFBP-3; Cellular senescence; Gene expression; PAI-1; SPARC **92**, 121

IGF-I; Aging; DNA synthesis; Gene expression; IGF-I receptor; Osteoprogenitor cells **92**, 1

IGF-I receptor; Aging; DNA synthesis; Gene expression; IGF-I; Osteoprogenitor cells **92**, 1

Interferometry; May Apple; Cellular senescence; Point-of-no-return; Nuclear macromolecules; Nucleolar degeneration; Nuclear matrix; Karyoskeleton; Cytofluorometry **92**, 83

Interleukin-6; Aging; Brain; Development; Cerebral cortex **92**, 185

Karyoskeleton; May Apple; Cellular senescence; Point-of-no-return; Nuclear macromolecules; Nucleolar degeneration; Nuclear matrix; Cytofluorometry; Interferometry **92**, 83

Lipofuscin; Aging; Retina; Vitamin A; Age pigment; Retinal pigment epithelium; Phospholipids **92**, 159

Longevity; Female mice; Glucose feeding **92**, 43

Longitudinal study; Age-related; rRNA genes **92**, 101

Lymphoma; Energy restriction; hypothermia; Torpor prevention; C57BL/6; MRL/lrp mice; Fas antigen; Aging **92**, 67

Lytic activity; Ageing; Cytoplasm perforin; Flow cytometry; Cytolytic cells **92**, 195

Maturation; Development; Mesenteric artery; Messenger RNA; Neurotransmitter receptor; Reverse transcription-polymerase chain reaction **92**, 235

May Apple; Cellular senescence; Point-of-no-return; Nuclear macromolecules; Nucleolar degeneration; Nuclear matrix; Karyoskeleton; Cytofluorometry; Interferometry **92**, 83

Mesenteric artery; Development; Maturation; Messenger RNA; Neurotransmitter receptor; Reverse transcription-polymerase chain reaction **92**, 235

Messenger RNA; Development; Maturation; Mesenteric artery; Neurotransmitter receptor; Reverse transcription-polymerase chain reaction **92**, 235

α-methyl-D-glucoside; Hexose transport; Development; Chicken **92**, 11

Microperoxisomal enzymes; Catalase; Acyl-CoA oxidase; Senescence-accelerated mouse (SAM); SAMP8; SAMR1 **92**, 175

Mortality; Aging; Cancer; Differential survival; Natural selection **92**, 111

Motor neurons; Extensor digitorum longus muscle; Rat; Motor units; Age **92**, 211

Motor units; Extensor digitorum longus muscle; Rat; Motor neurons; Age **92**, 211

MRL/lrp mice; Energy restriction; hypothermia; Torpor prevention; C57BL/6; Lymphoma; Fas antigen; Aging **92**, 67

Natural selection; Aging; Cancer; Differential survival; Mortality **92**, 111

Neurotransmitter receptor; Development; Maturation; Mesenteric artery; Messenger RNA; Reverse transcription-polymerase chain reaction **92**, 235

Nuclear macromolecules; May Apple; Cellular senescence; Point-of-no-return; Nucleolar degeneration; Nuclear matrix; Karyoskeleton; Cytofluorometry; Interferometry **92**, 83

Nuclear matrix; May Apple; Cellular senescence; Point-of-no-return; Nuclear macromolecules; Nucleolar degeneration; Karyoskeleton; Cytofluorometry; Interferometry **92**, 83

Nucleolar degeneration; May Apple; Cellular senescence; Point-of-no-return; Nuclear macromolecules; Nuclear matrix; Karyoskeleton; Cytofluorometry; Interferometry **92**, 83

Osteoprogenitor cells; Aging; DNA synthesis; Gene expression; IGF-I; IGF-I receptor **92**, 1

PAI-1; Cellular senescence; Gene expression; IGFBP-3; SPARC **92**, 121

PCNA; Rat; Aging; Cellular proliferation; Regenerating liver; Cellular distribution of PCNA **92**, 53

Periodontitis; Gingiva; Fibroblasts; Ageing **92**, 31

Phospholipids; Aging; Retina; Vitamin A; Age pigment; Retinal pigment epithelium; Lipofuscin **92**, 159

PKCζ; Aging; Brain; *Ceratitis capitata*; Fruit-fly; PKC **92**, 21

PKC; Aging; Brain; *Ceratitis capitata*; Fruit-fly; PKCζ **92**, 21

Point-of-no-return; May Apple; Cellular senescence; Nuclear macromolecules; Nucleolar degeneration; Nuclear matrix; Karyoskeleton; Cytofluorometry; Interferometry **92**, 83

Rat; Aging; Cellular proliferation; Regenerating liver; PCNA; Cellular distribution of PCNA **92**, 53

Rat; Extensor digitorum longus muscle; Motor neurons; Motor units; Age **92**, 211

Rat; Regenerating liver; DNA polymerases; Synthetic template-primer; Fidelity; Aging **92**, 143

Regenerating liver; Rat; Aging; Cellular proliferation; PCNA; Cellular distribution of PCNA **92**, 53

Regenerating liver; Rat; DNA polymerases; Synthetic template-primer; Fidelity; Aging **92**, 143

Retina; Aging; Vitamin A; Age pigment; Retinal pigment epithelium; Lipofuscin; Phospholipids **92**, 159

Retinal pigment epithelium; Aging; Retina; Vitamin A; Age pigment; Lipofuscin; Phospholipids **92**, 159

Reverse transcription-polymerase chain reaction; Development; Maturation; Mesenteric artery; Messenger RNA; Neurotransmitter receptor **92**, 235

rRNA genes; Age-related; Longitudinal study **92**, 101

SAMP8; Microperoxisomal enzymes; Catalase; Acyl-CoA oxidase; Senescence-accelerated mouse (SAM); SAMR1 **92**, 175

SAMR1; Microperoxisomal enzymes; Catalase; Acyl-CoA oxidase; Senescence-accelerated mouse (SAM); SAMP8 **92**, 175

Senescence-accelerated mouse (SAM); Microperoxisomal enzymes; Catalase; Acyl-CoA oxidase; SAMP8; SAMR1 **92**, 175

SPARC; Cellular senescence; Gene expression; IGFBP-3; PAI-1 **92**, 121

Survival of mice; Aging; Dietary antioxidants **92**, 227

Synthetic template-primer; Rat; Regenerating liver; DNA polymerases; Fidelity; Aging **92**, 143

Torpor prevention; Energy restriction; hypothermia; C57BL/6; MRL/lrp mice; Lymphoma; Fas antigen; Aging **92**, 67

Vitamin A; Aging; Retina; Age pigment; Retinal pigment epithelium; Lipofuscin; Phospholipids **92**, 159
